

## **HSR&D Web-Based Data Management Announcement**

HSR&D is pleased to announce that beginning **December 1, 2005** a new [ART Program Website](#) will be available to facilitate the submission of Annual Abstract Reports and Clinical Trial Registration for funded HSR&D and QUERI projects. In addition, investigators at sites with no HSR&D Center will use the site to enter their Personnel Profile information.

The development of this process was partially in response to new ORD guidelines requiring registration of clinical and observational trials prior to enrolling participants or allocation of funds. The website is on the VA Intranet and is accessible directly by funded investigators or staff members, provided individuals are listed as part of that project's personnel in the ART program.

If you or any of your Center investigators have received recent approval for, or actual funding of, an HSR&D or QUERI clinical or observational trial and have not been contacted by ART to complete NLM registration, please e-mail the HSR&D NLM Registration Program Manager, Jean Sullivan at [ART@va.gov](mailto:ART@va.gov).
